

# Commoning the Anthropocene

VIRTUAL CONFERENCE • APRIL 21 - 23 • ONLINE • WORLDWIDE

## Online Conference

No hassle, costs, or carbon emissions from traveling. Attend the entire conference safely from home.

## Three Days

Three days packed with prerecorded sessions and live events

## Meetup and Network

Interact with your peers during networking events.

## Aim & Scope

We are pleased to announce our call for individual presentations, special sessions, webinar panel discussions, and methods workshops. This conference aims to bring together scholars and practitioners interested in the role that the exercise of common property systems to land use and other shared resources (commoning) will play in the Anthropocene. We will cover topics such as conceptualizing commons across multiple scales, commoning in a telecoupled (or hyper-connected) world with tipping points and deep uncertainty, new forms, and trends in global commoning, interdisciplinary methods to study new emerging commons spaces, scaling up commoning in practice, and much more.

## Submissions

We welcome different kinds of contributions:

- + Individual Presentations
- + Special Sessions
- + Webinar Panel Discussions
- + Methods Workshops

**Call for Abstracts \***

\* English, French, Mandarin, Spanish language submissions acceptable

## Steering Committee

**Marty Anderies** (Conference Chair), Arizona State University, USA

**Arun Agrawal**, University of Michigan, USA

**Eduardo Sonnewend Brondizio**, Indiana University-Bloomington, USA

**Anne-Sophie Crépin**, Stockholm University, Sweden

**Graham Epstein**, University of Central Florida, USA

**Therese Lindahl**, Royal Swedish Academy of Sciences, Sweden

**Jean-Denis Mathias**, National Research Institute for Agriculture, Food and the Environment (INRAE), France

**Beril Ocakli**, Humboldt University of Berlin, Germany

**Caroline Schill**, Stockholm University, Sweden

**Sergio Villamayor-Tomás**, Autonomous University of Barcelona, Spain

## Conference Tracks

- + Commoning in the face of tipping points, transitions and deep uncertainty
- + Conceptualizing global commons and building capacity for multi-level governance
- + Commoning for international conflict transformation and resolution
- + Methods to study the dynamics of commoning in the Anthropocene
- + Commons-based alternatives to the Capitalocene

## Important Dates

**Abstract Deadline:**  
**February 26, 2021**

**Submit your Abstract \***

**Acceptance Notification:**  
**March 12, 2021**

**Deadline for pre-recorded video submission:**  
**April 9, 2021**
